Welcome

Your new Vodafone Mobile Broadband USB Stick connects your computer to the internet over the Vodafone mobile phone network.

You can now browse the web, pick up emails, and use any other internet service wherever there’s a mobile phone network, plus you can send, receive and manage SMS text messages directly on your computer.

Licenses

Where the applicable license entitles you to the source code of such software and/or other additional data, you may obtain it for a period of three years after purchasing this product, and, if required by the license conditions, for as long as we offer customer support for the product.

You may download the source codes from http://www.vodafone.com/k4203-z

Your Vodafone USB Stick is made exclusively for Vodafone by ZTE.
No part of this guide may be reproduced or transmitted in any form or by any means without prior written consent of ZTE.
Set up your USB Stick

Step 1
Slide the front cover off the USB Stick, and insert your SIM and SD card as shown.

Step 2
Plug the USB Stick firmly into your computer’s USB port.
Set up your USB Stick

On Windows 8, you can open the charms by sliding your finger in from the right-hand border of your touchscreen, or by pressing the Windows and C keys.

Step 3
On Windows XP, Windows Vista and Windows 7
The installer for the Vodafone Mobile Broadband application should start automatically. If it does not, browse to your USB stick in Windows and double-click the setup program.

On Windows 8
Open the Settings charm, select Networks and then Mobile Broadband. After you have clicked Connect, the Vodafone Mobile Broadband application will be downloaded automatically.

On Apple Mac
Double-click the Vodafone Mobile Broadband app icon to install it and start it.

On Linux
Installation guidelines can be found at http://support.vodafone.com/QuickStart/Linux
Connect/Disconnect
Connect to the internet via the mobile phone network or Wi-Fi, to browse the web or use email

Status
Check the status of the current connection

Shortcuts
Select further apps and services

Menu bar*
Send, receive and manage SMS, manage your account, and view further settings

Always Best Connected
View and edit your connection preferences

Help
View Help topics

* If you are a Contract customer, you can send and receive SMS. With Pay as You Go, network notifications will be delivered, but sending and receiving SMS is not supported.
Windows 7
Windows Vista
Windows XP
On Windows 8, the operating system looks after your connectivity, but you can use the Vodafone application to monitor the connection and manage your account.

1. **Status**
   Check the status of the current connection

2. **Account Status**
   Check your account status

3. **Online Account**
   Log in and manage your account online

4. **Discover**
   View details of further apps and services

5. **Help and Support**
   View Help topics
Windows 8
Apple Mac

1. Connect/Disconnect
   Connect to the internet via the mobile phone network or AirPort (Wi-Fi), to browse the web or use email

2. Status
   Check the status of the current connection

3. SMS*
   Open the SMS app to send, receive and manage messages

4. Navigation tabs
   Manage your connection preferences, view your usage, and manage your devices

5. Always Best Connected
   Control automatic connection management

* Please see SMS note on page 4.
Apple Mac
You can open the QuickStart application in your browser on Linux, or any other supported operating system.

1. **Status**
   Check the status of the current connection

2. **Navigation***
   View your QuickStart settings, use SMS and manage your account

3. **Current view**
   Displays the area of QuickStart that you selected

4. **Help**
   View Help topics

---

* Please see SMS note on page 4.
Linux – and all other systems
USB Stick LED lights

The LED light on your USB Stick shows which kind of mobile network has been found, and whether the USB Stick is connected to that network.

- **Red blinking**
  Searching for mobile network

- **Green blinking**
  A GPRS network has been found – you could connect

- **Green solid**
  Connected via GPRS

- **Blue blinking**
  A 3G network has been found – you could connect

- **Blue solid**
  Connected via 3G

- **Light blue solid**
  Connected via 3G Broadband.
Hints and tips

Install problems on Windows 7, Windows Vista or Windows XP
The following problems may be caused by an older release of the Vodafone Mobile Broadband application that was installed previously:
– No icon was created for the app on your desktop, or
– You double-click the desktop icon but the app doesn’t seem to start, or
– When you plug in your Stick, no CD-ROM appears, or
– The app starts but then shows “Device Not Detected”.
To make sure any older release is completely uninstalled:
– Download the Vodafone Mobile Broadband Cleanup app: www.support.vodafone.com/vmb_cleanup.
– Use Windows as normal to uninstall the Vodafone Mobile Broadband app
– Double-click the zip archive to unpack Cleanup
– Run VmbCleanup.exe and select all three options: Settings, Data and Device Registration
– Restart your computer
– Plug in your new USB Stick
– The correct app should then install automatically.
Hints and tips

If no network can be found
Change your physical location: in a building, move closer to a window, move higher up, or go outside.
On Windows 7, Windows Vista, Windows XP or Linux:
– Open the QuickStart application window
– Select the Settings heading on the Navigation bar
– Select the Network entry in the Menu bar on the left
– Click ‘Search’ to search for available networks
– Connect to one of the allowed networks
– Click ‘Save’ to save your change
On Apple Mac:
– Select the Connections tab
– Select Mobile Connections
– Click the magnifying glass ‘Search’ button
– Select one of the allowed networks.
If you are abroad, contact Support, and check that data services and roaming are enabled on your account.
Hints and tips

If no connection can be opened
– Check the status of your USB Stick in the Diagnostics window of your Vodafone Mobile Broadband app
– Wait a few minutes and try to connect again
– Close the application window and then re-open it
– Restart your computer
– Select an exclusive option in the connection or bearer settings, eg. ‘3G Only’ instead of ‘3G Preferred’
– If you are using a VPN (Virtual Private Network), contact the administrator of your VPN
– Check that the type of account you have with your mobile network operator is selected in your app, eg. ‘Prepaid’.

Support
As well as the Help documentation, your Vodafone Mobile Broadband app will include details of how to contact the Support team at your mobile network operator.
Glossary

**Bearer**  Communication method used for data transport over the mobile network, eg. 3G Broadband, HSPA, 3G, etc.

**Home network**  The network of the mobile operator who provided your SIM.

**Roaming**  You can use your mobile device on any other mobile network that has a roaming agreement with your operator, whether in your country or abroad.

**SIM**  Your Subscriber Identity Module is the small plastic chip that you will have received together with your mobile contract. Your SIM has gold contacts on one side.
EC DECLARATION OF CONFORMITY

It is hereby declared that following designated product:

Product Type: HSPA USB Stick
Model No.: K4203-Z
Product Description: HSPA USB Stick

This declaration applies to all specimens manufactured identical to the samples submitted for testing/evaluation.

Assessment of compliance of the product with the requirements relating to Directive 1999/5/EC was performed by ACB (Notified Body No.1688) and assessment of compliance of the product with the requirements relating to Directive 2011/65/EU was performed by Intertek Testing Services Ltd., Shanghai Lab, and Directive 2009/125/EC was performed by ZTE Corporation Reliability Testing Centre. The assessments were based on the following regulations and standards:
