

Invoice guide for Vodafone Germany

When issuing an invoice please note that the invoice must fulfill all relevant VAT requirements and contain all mandatory information.

To enable a smooth and timely processing of your invoice, please ensure that all additional contractual requirements for invoices and attachments are considered.

For your information we have summarized the principles regarding the requirements for invoicing. In individual cases, if necessary, additional tax details might be required.

Mandatory information required on the invoice:

- Invoice date
- Unique invoice number
- Supplier name & address
- Supplier VAT number/Tax number
- Supplier bank details
- Registered name & address of Vodafone (see Appendix)
- The quantity and nature/description of goods and/or services supplied
- Net unit prices, net and gross value of the invoice
- The applicable Value Added Tax (VAT) rate and the total VAT amount
- The Purchase Order (PO) number provided by Vodafone (in case the invoice is issued on PO). If no PO number is mentioned on the invoice, it will be rejected except for site rentals, electricity, Gas, water, interconnect and roaming Suppliers. If the PO has multiple line items, make sure to always specify the line numbers as well
- Document type: Invoice /Credit note

- Exchange rate (if applicable)
- If applicable: if the reverse charge mechanism applies, „reverse charge” must be mentioned on the invoice

Invoicing options:

- 1. E-invoicing** is the primary, most preferred invoicing option due to its wide range of benefits. For suppliers, these key benefits are faster payments, less costs, fewer rejected invoices, increased productivity, enhanced accounts reconciliation as well as improved customer relationships and cash management.

Suppliers that are registered on the [Taulia](#) or [Ariba](#) e-invoicing solutions should send their invoices electronically. For further information or enrollment, please reach out to the applicable support mailbox: business-support.de@vodafone.com or business-support.kd@vodafone.com (see further guidance in the Appendix).

- 2.** If e-invoicing is not possible, suppliers should send their invoice **via Email:**

- Invoices must be sent in PDF / TIFF format to the email address

invoice.de@vodafone.com

invoices.kdg@vodafone.com

- 1 PDF/TIFF file should contain only 1 invoice or credit note
 - Please ensure that PDF/TIFF file is monochrome (black and white) and that the invoice quality is readable. Handwritten instructions (like PO number) on PDF invoices are not identified by scanning application. If this is required, please use TIFF invoice image.
- 3.** If neither e-invoicing nor emailing is possible, suppliers should send their invoice **by Post** to the postal address in Appendix
